

Solutions Architect at Vercel

Coen Hewes

coenhewes@outlook.com · 0477 256 675 · Melbourne, VIC · linkedin.com/in/coenhewes

SUMMARY

Solutions Architect and Technical Sales Executive with 8+ years of experience in SaaS, data, and analytics. Expertise in bridging the gap between business value and technical implementation, having closed 6-figure ARR deals with ASX-listed and Fortune 500 companies. Proven ability to step into Sales Engineering roles, lead technical discovery, and guide solution architecture. Self-taught developer with hands-on experience building and deploying AI-powered applications and modern web platforms using **Next.js**, **Vercel AI SDK**, **React**, and **Python**. Passionate about enabling developers and helping enterprises standardize on modern web architectures.

EXPERIENCE

Senior Enterprise Account Executive — Branch

Nov 2024 – Feb 2026 · Melbourne, VIC

- Partnered with Solution Architects to deliver technical POCs that increased deal conversion rates by 25%; frequently stepped in as a Sales Engineer to lead technical discovery and solution design for complex accounts.
- Collaborated with enterprise marketing teams to architect solutions for mobile attribution and deep linking, translating technical requirements into business value.
- Closed deals with Nine Entertainment & News Corp, leveraging MEDDICC to shorten 6-9 month sales cycles by 20%.
- Generated pipeline via consultative discovery calls with C-level executives, increasing qualified leads by 40%.

Enterprise Account Executive — Supermetrics

Oct 2022 – Oct 2024 · Melbourne, VIC

- Exceeded \$300K quarterly ARR targets consistently across 8 consecutive quarters; achieved Presidents Club as top outbound performer.
- Led technical discovery sessions to map data requirements and architecture for enterprise data consolidation initiatives involving 150+ data sources.
- Closed company record for largest outbound deal at A\$185,000 ARR; secured high-value enterprise contracts with Myer, Wesfarmers, and Australian Broadcasting Corporation.
- Managed full sales cycle from prospecting through contract negotiation, averaging 6-12 month enterprise sales cycles.

Enterprise Account Executive — Whispir

Aug 2021 – Oct 2022 · Melbourne, VIC

- Cloud-based enterprise communications platform unifying email, SMS, voice, video, and web chat channels.

- Focused on Partner Relationship Management and consultative selling to drive adoption of omni-channel communication solutions.

Account Executive, JAPAC — Brandwatch

Jan 2018 – Aug 2021 · Melbourne, VIC

- Social listening and consumer intelligence SaaS platform leveraging AI/ML for brand insights.
- Consistently exceeded \$200K quarterly ARR targets across all quarters from FY19-FY21; achieved Presidents Club.
- Articulated the technical value of AI/ML-driven social sentiment analysis to engineering and product stakeholders to drive enterprise adoption.
- Ranked #1 Outbound Rep GLOBAL in FY19 Q3; pioneered territory development strategies across Japan and APAC.

Sales Executive — National Australia Bank

Jan 2017 – Jan 2018 · Melbourne, VIC

- Consistently achieved monthly sales targets within the financial services division.

TECHNICAL PROJECTS

Cornerman | Real-time AI Coaching Application

- Built a real-time interview coaching tool using **Next.js 16**, **React 19**, and **Vercel AI SDK**.
- Implemented sub-2s inference hints by streaming tab/system audio via WebSocket to a FastAPI + MiniMax engine.
- Utilized **Vercel AI Gateway** and Postgres (Neon) for data management and Clerk for authentication.

Parallax | Sales Meeting Intelligence Platform

- Developed a desktop app using Python and PyQt6 that detects meeting platforms (Zoom, Teams) to surface real-time coaching.
- Integrated **GCP Vertex AI** to fine-tune a Qwen model using LoRA adaptors for specific sales methodology coaching (MEDDICC, Triangle Selling).
- Built a multi-tenant manager portal using Next.js 15 for team analytics and coaching signals.

Forge Logbooks | E-commerce Platform

- Architected a full storefront for custom print-on-demand logbooks using Next.js 14, Stripe, and the Lulu Print API.
- Implemented dynamic PDF generation with pdf-lib and customer dashboard functionality.

Forge Blog | Agent-ready Content Platform

- Built an open-source Next.js blog with scheduled publishing, featuring a skill layer allowing LLMs to write and schedule posts autonomously.
- Utilized GitHub Actions for CI/CD and JSON-LD for SEO.

Production Systems

- Designed and built a production invoicing and Purchase Order system currently used by an operating company.
